Emergency Mail Sender | AUG 2015 - DEC 2015

Emergency mail sender is an android application targeted for many users who cannot access their mobiles for long duration of time. EMS sends the missed calls and message details to the user specified email id. Few times by not attempting Calls/Messages for long hours we may need to face few issues later. To avoid this, we are coming up with an application where we can integrate the mobile with SMTP email system so that employee/user will get the notification of email or SMS to their email client which is installed at his/her work stations.
